

Setting up of agro-processing units in the producing areas to reduce wastage, especially of horticultural produce, increased value addition and creation of off-farm employment in rural areas will be encouraged with a view to ensuring a better return to the grower. Collaboration between the producer cooperatives and the corporate sector will be encouraged to promote agro-processing industry. The Small Farmers Agro Business Consortium (SFAC) will be energized to cater to the needs of farmer entrepreneurs and promote public and private investments in agri-business.

The approach to land reforms will focus on area like redistribution of surplus and waste lands among the landless, updating and improvement of land records, development of lease markets and recognition of women's right in land.

Private sector participation will be promoted through contract farming and land leasing arrangements to allow accelerated technology transfer, capital inflow and assured markets for crop production, especially of oilseeds, cotton and horticultural crops.
